Field	Value
Title	MU MBA — Open edX Teak Course Production Recommendations
Version	1.0
Status	For stakeholder review
Course analyzed	MU+MBAD7112+DEV_01 — Project Management
Platform	Open edX Teak
Program scope	14 courses, online MBA
Program reference	Online-Course-Material-Development.pdf
QA reference	DIGITAL CONTENT QUALITY ASSURANCE RUBRIC TEMPLATE.pdf
Author	Mekelle University e-Learning Team
Collaboration	e-SHE / MoE / ASU
Target audience	Leadership, IDs, course authors, Open edX experts, multimedia, QA, ICT

Alignment statement. This document aligns with:

- Roadmap Phases 0–9 in *Online-Course-Material-Development.pdf*
- The RACI matrix in Section 2.3 of that document
- Appendix B (Branding Elements) of that document
- The 9-category QA rubric template, expanded to 14 categories
- Open edX Teak platform capabilities

Chapter 1

Executive Summary

The MU+MBAD7112+DEV_01 course (Project Management) is **not ready for publication**. It is a template shell in early population state. Most content is placeholder text, all **about/** metadata files are empty, and unpublished draft components duplicate and contradict live components.

The two program PDFs provide the roadmap (*Online-Course-Material-Development.pdf*) and the QA baseline (*DIGITAL CONTENT QUALITY ASSURANCE RUBRIC TEMPLATE.pdf*). This recommendation aligns to:

- Roadmap Phases 0–9
- The RACI matrix and tool responsibilities in Section 2.3
- Appendix B (Branding Elements)
- The 9-category QA rubric, expanded to 14 categories with scoring bands and gate mapping
- Open edX Teak capabilities, including `course_wide_css`

Key decisions:

1. A common CSS file, scoped to course content only, is uploaded via Studio → Files & Uploads and applied via `course_wide_css` (Teak-supported).
2. Authors work in Open edX Studio as primary authoring tool. GitHub holds exported course snapshots, issue tracking, and GitHub Pages previews.
3. The QA rubric is expanded to 14 categories with a 0–5 scoring band, a minimum pass threshold of 4.0 weighted average, and no category below 3.
4. All **about/** metadata must be populated before catalog visibility can be approved.
5. The `video_iframe` XBlock is not standard in Teak and must be migrated to standard `video` XBlocks or confirmed as a custom install.
6. Multiple-choice items with all `correct="true"` choices will only award a point for the first correct choice in Teak. The pre-course self-assessment must be redesigned as a survey or poll XBlock.

Chapter 2

Findings from the Attached Course

2.1 Course Metadata — Critical Gap

The about/ directory contains 10 files. Eight are 0 bytes:

File	Size	Status
about_sidebar_html.html	0	Empty
description.html	0	Empty
duration.html	0	Empty
entrance_exam_enabled.html	0	Empty
entrance_exam_id.html	0	Empty
entrance_exam_minimum_score_pct.html	2	Contains only 50
overview.html	170	One generic paragraph
short_description.html	0	Empty
subtitle.html	0	Empty
title.html	0	Empty

The course catalog will show no title, subtitle, description, or duration. The entrance exam is configured with a 50% minimum score but no entrance exam content exists. This is a **P0 blocker**.

2.2 Template Placeholder Content — Pervasive

Placeholder text appears in nearly every content file reviewed:

- [Insert module objective here]
- [Insert course description here]
- [Insert activity/assessment here along with dates, if applicable]
- [Insert brief module description here]
- [Insert objective with verb and learning expectation]
- [Insert email here or other contact information or erase]
- [Insert Video introduction for the module or erase if there is no video]
- [Insert banner title]
- Click "Edit" to change the title
- Add the content you want students to see on this page.

This is the single largest content-quality issue. It maps to Roadmap Phase 1 (Content Authoring), which is not yet complete.

2.3 Duplicate and Conflicting Content

Confirmed duplicates between live and draft layers:

UUID	Live	Draft
3e45c044f5904531aae4851facf6bda2	yes	yes
61ddd69424f94743bb3c9a0f1c7b8b6b	yes	yes
81723e3f0ea2444bbd7956d3e58a6fa8	yes	yes
a4c63782c79d4b83998ba44f77dd704a	yes	yes
b824e48117954704884ee8ac8dc63367	yes	yes
c61ee725f7ca47459bc2b7dadaa7be35	yes	yes
d459779169f04146b82c14397e159ac7	yes	yes
fc905ff03c204b6fbc8e9c0ecde2ed0c	yes	yes
html1, html2, html4, html6, html8, html19	yes	yes

Additional duplication inside html1/:

- html1.xml and html6.xml both reference block-v1:ASU+T101SBX+DEV_01+type@html+block@b7b7fdb67f
- html4.xml and html8.xml both reference block-v1:ASU+T101SBX+DEV_01+type@html+block@7831baba0e
- html19.xml references block-v1:ASU+T101SBX+DEV_01+type@html+block@html10

2.4 Cross-Course and Cross-Program Contamination

Item	Origin
html1.xml, html4.xml, html6.xml, html8.xml, html19.xml	block-v1:ASU+T101SBX+DEV_01
problem1.xml	block-v1:e-SHE+CE105+Q1
static/ASM246_W6_...	ASM246 course
static/Course_Welcome_Banner_1..6.jpeg	ASU template
static/FinalCheckButtonASM.png	ASU template
static/edX_progress_page.png	e-SHE Template101
static/MoE_EthERNet_Accessing_guides.pdf	e-SHE Template101
static/e-she-learning-communities-facultye-she*.zip	e-SHE

2.5 Invalid HTML Patterns

Recurring structural defects:

- Invalid nested lists: `<ul><ul>...</ul></ul>`
- Nested empty lists: `<ul><li style="list-style-type: none;"><ul>...`
- Empty anchors: `<span id="docs-internal-guid-...">`
- Orphan attributes: `<span div="" style="...">`
- Broken target: `target="[object Object]"`
- Heading level misuse: `<h4><img ... alt="Learning Outcomes" /></h4>`
- `<h2>` used inside course content, competing with platform page titles

2.6 Inline and Embedded Styles

Inline styles that will override common CSS are present across files. Hard-coded colors found: #127DAD, #82CFF0, #F1F7FC, #333, #ffffff, #000000, #548dd4, #4c4642, rgb(49, 49, 49).

Embedded `<style>` blocks in content components:

- `.instructor-module-banner` in `81723e3f0ea2444bbd7956d3e58a6fa8.html`
- `.banner-container`, `.banner-image`, `.editable-text`, `.editable-title`, `.editable-subtitle` in `c61ee725f7ca47459bc2b7dadaa7be35.html`

2.7 contenteditable="true" — Template Authoring Artifact

Found in:

- `81723e3f0ea2444bbd7956d3e58a6fa8.html`: `.instructor-module-title`, `.instructor-module-subtitle`
- `c61ee725f7ca47459bc2b7dadaa7be35.html`: `.editable-title`, `.editable-subtitle`

This must be removed for students. It is a security and UX risk.

2.8 Assessment Issues

- `problem1.xml` — all seven choices marked `correct="true"`. **In Teak, only the first correct choice is awarded a point.** Redesign as survey or poll.
- `problem2.xml` — `stringresponse answer="the correct answer"` placeholder.
- `problem3.xml` — contains Open edX template text.
- `ee78b25a6eb9412fb34f55abf8033159.xml` — invalid XML structure: `<label>2. not closed before <multiplechoiceresponse>`.
- `cc44e80a2ca64c03a130de60507a74f9.xml` — problem used for a 2,000-word report. Should be ORA / `openassessment` or `staff-graded`.
- `c0e198d218c843e08cf3c96a40ec6c79.xml` — long feedback embedded in `answer` attribute.

2.9 Video Issues

All 8 videos use YouTube-only hosting (`edx_video_id=""`, `html5_sources=""`) with no captions or transcripts.

File	YouTube ID	Defect
0c6a09...	ooSgnmwHd08	No captions
7b3247...	3_yD_cEKoCk	Duplicate ID
2949dc...	3_yD_cEKoCk	Duplicate ID
70969a...	ZWmXi3TW1yA	No captions
233035...	IyYm-7TPQLY	Malformed title (leading “: ”)
a7893d...	dgBx2V-872c	No captions
c63a0f...	rGN6-HTDj04	No captions
d96ca9...	6Qj9RNXTJ4Q	No captions

2.10 video_iframe XBlock — Teak Compatibility Risk

Two verticals use a custom video_iframe XBlock pointing to `https://media.courses.ethernet.edu.et/embed`

- `f61e7b9c527040f08f16567d874b0bde.xml`
- `4bfb6717391d43b8a5a569fd18378561.xml`

This XBlock is not standard in Teak. The roadmap specifies YouTube unlisted/private as the video hosting standard. This is a **roadmap divergence** to resolve.

2.11 Additional Findings

- Staff-only template chapter `4356f84033f24b2ea2cbd5eca77b2235.xml` is correctly `visible_to_staff_on`. Preserve it.
- Broken static links in `d22b04c75dd34fde869373b0f5b57a81.html`: `/static/ASM246_Syllabus.pdf`, `/static/ASM246_Schedule.pdf`.
- Base64 image and VML markup in `1cdedf6cc1e14630ad5f884562a58e6e.html`.
- Citation “Source: ProjectManager (2026, enhanced by ChatGPT)” must be reviewed by SME.
- `advanced_modules` in `DEV_01.xml` includes several XBlocks not shipped with Teak by default (`crowdsourcenhinter`, `recommender`, `rate`, `staff_graded`, `google_drive`, `videoalpha`, `video_iframe`). Confirm install status with the Open edX expert.

Chapter 3

Branding Variables

Replace every placeholder with approved university values before production. Confirm color contrast meets WCAG 2.1 AA.

Variable	Purpose	Placeholder	Notes
{{UNIVERSITY_NAME}}	Official name	Mekelle University	Confirm English name
{{LOGO_URL}}	Primary logo	/static/mu-logo.svg	SVG preferred
{{PRIMARY_COLOR}}	Main brand color	#127DAD	Replace with MU color
{{SECONDARY_COLOR}}	Secondary accent	#82CFF0	Replace with MU color
{{ACCENT_COLOR}}	Focus/highlight	#F2A900	Must pass AA
{{FONT_FAMILY}}	Approved font	Arial, Helvetica, sans-serif	Confirm licensing
{{LINK_COLOR}}	Hyperlink	#0056B3	Must pass AA
{{HEADER_STYLE}}	Header border	border-bottom: 2px solid accent	Per Appendix B
{{WARNING_COLOR}}	Warning callout	#b91c1c	
{{SUCCESS_COLOR}}	Success callout	#15803d	
{{FOOTER_TEXT}}	Footer copyright	© Mekelle University	
{{OPEN_EDX_VERSION}}	Platform	Teak	Confirmed
{{BRAND_GUIDELINES}}	Brand doc	TBD	Needed before final CSS
{{CONSTRAINTS}}	IT/a11y policy	WCAG 2.1 AA	Confirm

Chapter 4

Common CSS

The complete CSS listing is provided in Appendix ???. The file `mu-mba-brand.css` must be uploaded to Studio → Files & Uploads, then applied via

Studio → Settings → Advanced Settings → `course_wide_css`

with value:

```
/static/mu-mba-brand.css
```

4.1 Scope Rules

- Only targets content inside `.xblock-student_view`.
- Never uses global selectors (`body`, `header`, `nav`, `button`, `input`).
- Replaces embedded classes `.instructor-module-banner`, `.banner-container`, `.editable-*` with semantic `.mba-*` classes.
- All values requiring management approval are placeholders.

4.2 What CSS Can and Cannot Do in Teak

Can: style content inside XBlocks, headings, lists, callouts, tables, images, references, assessment wrappers.

Cannot: style platform header, footer, dashboard, login page, or global navigation. Those require a theme, coordinated with the Open edX expert role.

Chapter 5

Harmonized Content Formatting Guidelines

5.1 Heading Hierarchy

Level	Use	Avoid
h3	Main section in HTML component	h2
h4	Subsection	Bold paragraphs as headings
h5	Minor sub-subsection	Skipping levels

5.2 Lists

- Use `<ul>` and `<ol>`.
- Never `<ul><ul>...</ul></ul>`.
- Never `list-style-type: none` to simulate indentation.
- Never manual bullets inside `<p>`.
- Never `mso-list` Word markup.

5.3 Callouts

Standard classes: `.mba-callout`, `.mba-note`, `.mba-warning`, `.mba-important`, `.mba-definition`, `.mba-example`. Never use inline background, border, or color.

5.4 Assessments

- Use `problem` for quizzes, multiple choice, checkboxes, dropdowns, numerical input, text input.
- Use `ORA` / `openassessment` or staff-graded for essays, reports, reflective responses.
- Remove all placeholder text.
- Do not change assessment logic without ID approval.
- **Teak note:** multiple-choice items with all `correct="true"` award a point only for the first correct choice. Redesign as survey or poll where appropriate.

5.5 Images, Tables, Captions

- Every image needs `alt` text or `alt=""`.
- Use `<figure>` and `<figcaption>`.
- Use `<table class="mba-table">` with `<caption>` and `<th scope="col">`.
- Never tables for layout.
- Never base64 images or VML markup.

5.6 References

Use APA 7 with `.mba-reference` class, hanging indent, alphabetical order.

5.7 Links

Descriptive link text only. No “click here”, no raw URLs, no Bing/Google tracking URLs. Fix `target="[object Object]"`.

5.8 Video

- YouTube unlisted/private per roadmap, unless `video_iframe` is officially supported.
- Provide captions and transcripts for every video.
- Fix duplicate YouTube IDs.
- Fix malformed `display_name`.

Chapter 6

Role-Based Task Matrix

Role	Task	Priority	Notes
Open edX Expert	Confirm <code>course_wide_css</code> enabled in Teak	P0	Studio Advanced Settings
Open edX Expert	Validate all <code>problem/*.xml</code> import	P0	Invalid XML found
Open edX Expert	Confirm <code>video_iframe</code> support or migrate	P0	Not standard in Teak
Open edX Expert	Confirm <code>advanced_modules</code> install status	P0	Several non-default
Open edX Expert	Set up GitHub repos per course	P0	Roadmap Phase 0
Open edX Expert	Build GitHub Pages preview pipeline	P0	Roadmap Phase 5
Open edX Expert	Apply common CSS	P1	Roadmap Phase 4
ID	Populate all <code>about/</code> metadata	P0	Catalog blocker
ID	Define harmonized standards	P0	Section 5
ID	Review problem components	P1	Preserve logic
ID	Resolve live vs. draft conflicts	P1	16+ duplicates
ID	Reconcile ID guidance across 14 courses	P1	Roadmap Problem 10
Course Author	Replace <code>[Insert ...]</code> placeholders	P0	Largest gap
Course Author	Remove embedded styles	P1	Replace with <code>.mba-*</code>
Course Author	Remove <code>contenteditable="true"</code>	P1	Security/UX
Course Author	Remove VML and <code>mso-*</code>	P1	
Course Author	Replace base64 images	P1	
Course Author	Fix nested lists and orphan attributes	P1	
Course Author	Fix broken static links	P1	ASM246 links
Course Author	Fix <code>target="[object Object]"</code>	P1	
Course Author	Fix malformed video names	P1	
Course Author	Populate references	P1	
Multimedia	Re-upload videos with captions	P0	All 8 missing
Multimedia	Fix duplicate YouTube ID	P0	2 videos share ID
Accessibility / QA	WCAG 2.1 AA audit	P0	Roadmap Phase 6
Accessibility / QA	Validate color contrast	P0	Before 14-course roll-out
Project Manager	Confirm 13 vs. 14 scope	P0	PDF inconsistent
Project Manager	Track risks in GitHub Projects	P0	Roadmap 3.4
Leadership	Approve branding variables	P0	Before Phase 4
Leadership	Approve QA rubric	P0	Section 7

Role	Task	Priority	Notes
Leadership	Sign off via GitHub Projects	P1	Phase 8

Chapter 7

Enhanced QA Rubric

The baseline rubric has 9 categories. This recommendation expands it to 14. Each category is scored 0–5. Minimum pass threshold: **4.0 weighted average**, with **no category below 3**.

#	Category	Baseline?	Key criteria	Weight
1	Instructional Design Quality	Yes	Measurable objectives; logical flow; engagement; alignment; UDL	12%
2	Content Accuracy and Relevance	Yes	Accurate, current, error-free; SME sign-off; MBA relevance	12%
3	Accessibility and Inclusivity	Yes	WCAG 2.1 AA: headings, landmarks, alt, tables, contrast, focus, captions, keyboard	15%
4	Technical Quality	Yes	XML valid; no broken links; no base64/VML; mobile; importability	10%
5	Learner Support	Yes	Orientation; navigation; prompts; time-on-task; prerequisites	5%
6	Assessment and Evaluation	Yes	Blueprint coverage; Bloom balance; grading policy; rubric clarity; feedback	10%
7	Ethical and Legal Standards	Yes	Copyright; license; attribution; data privacy	5%
8	Cultural Sensitivity	Yes	Ethiopian/East African context; representation; language	5%
9	Continuous Improvement	Yes	Post-launch cadence; analytics; feedback loop	3%
10	Branding and Visual Identity	New	Logo, palette, typography, header/footer, callouts, tables, images, video	8%
11	GitHub and Version Control	New	Repo structure; commit hygiene; branches; issues; PRs; Pages	5%
12	Open edX Teak Compatibility	New	Component support; <code>advanced_modules</code> ; CSS applied; no VML	5%
13	Course Metadata and Catalog	New	Title, subtitle, description, overview, duration, prerequisites, instructor	3%
14	Data and Analytics Readiness	New	Event tracking; progress page; grading policy; KPIs	2%

7.1 Gate Mapping to Roadmap

Phase	QA gate	Owner
Phase 3	Repo structure; export success	Open edX Expert
Phase 4	Categories 10, 12	Open edX Expert + Leadership
Phase 5	Preview renders	Open edX Expert
Phase 6	Categories 1, 2, 5, 6, 8	ID + Reviewer
Phase 7	Categories 3, 4, 12, 13, 14	Open edX Expert + ICT
Phase 8	All 14 categories $\geq$ threshold	Reviewer + Leadership
Phase 9	Course live; monitoring active	Leadership

Chapter 8

Implementation and QA Checklist

8.1 Step-by-Step Rollout

1. Complete file intake.
2. Approve branding variables (Section 3) with leadership.
3. Approve enhanced QA rubric (Section 7) with leadership and ID.
4. Populate all `about/` metadata files.
5. Remove all `[Insert ...]` placeholders.
6. Resolve live vs. draft component conflicts.
7. Remove embedded `<style>` blocks and inline styles.
8. Apply common CSS to a pilot module.
9. Run accessibility and technical QA on pilot.
10. Fix all video captions and duplicate YouTube ID.
11. Validate all `problem/*.xml` in Teak.
12. Migrate `video_iframe` to standard `video` or confirm install.
13. Redesign `problem1.xml` self-assessment for Teak.
14. Run full QA on the course.
15. Export to GitHub; run GitHub Pages preview.
16. Final sign-off in GitHub Projects.
17. Publish.
18. Roll out to remaining 13 courses.

8.2 Studio and LMS QA Checklist

- ☐ All `about/` files populated
- ☐ No `[Insert ...]` placeholders
- ☐ No embedded `<style>` blocks
- ☐ No inline `style="..."` (approved exceptions only)
- ☐ No `contenteditable="true"`
- ☐ No `mso-*` or VML

- ☐ No base64 images
- ☐ Headings use `h3/h4/h5`
- ☐ Lists use valid `<ul>/<ol>`
- ☐ Callouts use `.mba-callout`
- ☐ References use `.mba-reference`
- ☐ Tables use `.mba-table` with `<caption>` and `<th scope>`
- ☐ Images have alt text
- ☐ Videos have captions and transcripts
- ☐ No duplicate YouTube IDs
- ☐ Static links resolve
- ☐ `target="[object Object]"` fixed
- ☐ Problem XML validates
- ☐ Answer keys are real
- ☐ ORA/staff-graded used for essays
- ☐ Grading policy `min_count` matches counts

8.3 Accessibility Checklist (WCAG 2.1 AA)

- ☐ Contrast $\geq 4.5:1$ normal, $3:1$ large
- ☐ Alt text meaningful or empty
- ☐ Captions and transcripts
- ☐ `<caption>` and `<th scope>`
- ☐ Iframes have `title`
- ☐ Keyboard-only navigation
- ☐ Focus indicators visible
- ☐ No reliance on color alone
- ☐ Logical heading hierarchy
- ☐ Language attributes set
- ☐ No autoplay, no keyboard traps

8.4 Cross-Browser and Mobile

- ☐ Chrome, Firefox, Safari, Edge
- ☐ iOS Safari, Android Chrome
- ☐ 360, 768, 1024, 1440 px
- ☐ Tables scroll on mobile
- ☐ Video player responsive

8.5 Cross-Course Validation (14 Courses)

- ☐ Same CSS applied
- ☐ Same heading hierarchy
- ☐ Same callout classes
- ☐ Same reference format
- ☐ Same assessment presentation
- ☐ Same metadata structure
- ☐ Same QA rubric applied
- ☐ Same GitHub repo structure
- ☐ Branding consistency $\geq 4.5/5$

Chapter 9

Risks, Assumptions, and Open Questions

9.1 Risks

#	Risk	Likelihood	Impact	Mitigation
1	Course content not yet authored	High	High	Complete Roadmap Phase 1 before Phase 6
2	<code>video_iframe</code> not supported in Teak	High	High	Migrate to standard <code>video</code>
3	All-correct MCQ awards only first choice in Teak	High	Medium	Redesign as survey/poll
4	Duplicate YouTube ID	High	Medium	Fix before Phase 7
5	Live vs. draft conflicts	High	High	Resolve before cleanup
6	Empty <code>about/</code> metadata	High	High	Populate before Phase 8
7	Cross-course asset contamination	High	Medium	Audit and replace
8	13 vs. 14 course scope	Medium	Medium	Confirm with PM
9	Authors change assessment logic	Medium	High	ID review all changes
10	Scale to 14 courses	High	High	Common CSS + rubric + exemplar
11	No captions on any video	High	High	Multimedia remediation
12	Non-default <code>advanced_modules</code>	Medium	Medium	Confirm install with Open edX expert

9.2 Assumptions

- MU is Mekelle University; ASU is Arizona State University; MoE is Ministry of Education; e-SHE is the program.
- `Online-Course-Material-Development.pdf` is authoritative.
- QA rubric PDF is baseline to be expanded.
- Roadmap Phases 0–9 is the intended workflow.
- RACI in Section 2.3 is authoritative unless amended.
- Target accessibility: WCAG 2.1 AA.
- Course meaning, assessment logic, and learning outcomes must not change.
- Staff-only template chapter stays.
- Scope is 14 courses.
- Platform is Open edX Teak.

9.3 Open Questions

1. 13 or 14 courses? Roadmap is internally inconsistent.
2. Is `course_wide_css` enabled in the Teak instance?
3. Is `video_iframe` installed, or must all videos migrate?
4. Are `drafts/` components in scope?
5. Are `html1`–`html20` and `vertical1`–`vertical16` real content or deletable?
6. Replace ASU template tutorials with MU equivalents?
7. Is all-correct self-assessment intentional?
8. Convert `cc44e80...` (2,000-word report) to ORA?
9. Final brand colors, fonts, logo?
10. Final publication approval authority?
11. Is `e-she-learning-communities...zip` referenced?
12. Is entrance exam enabled?
13. Are ASU/T101SBX source blocks still active?
14. Which `advanced_modules` are actually installed in Teak?

Chapter 10

Immediate Next Actions

1. **Leadership:** approve branding variables (Section 3) and QA rubric (Section 7).
2. **Open edX Expert:** confirm `course_wide_css`, `video_iframe`, and `advanced_modules`.
3. **ID:** populate all `about/` metadata files.
4. **Course Authors:** begin replacing `[Insert ...]` placeholders, starting with Module One.
5. **Multimedia:** fix duplicate YouTube ID and add captions to all 8 videos.
6. **Course Authors:** remove embedded `<style>` from `81723e3f...` and `c61ee725....`
7. **Course Authors:** resolve live/draft duplicate UUIDs.
8. **Open edX Expert:** validate all `problem/*.xml` in Teak.
9. **Project Manager:** confirm 13 vs. 14 course scope.
10. **Open edX Expert:** apply common CSS to Module One as pilot.

Appendix A

Common CSS Listing

Appendix B

QA Rubric Detail

For each of the 14 categories, scoring bands:

- **5 — Exemplary:** exceeds expectation; no remediation required.
- **4 — Proficient:** meets expectation; minor optional improvements only.
- **3 — Developing:** meets minimum; specific remediation items identified.
- **2 — Beginning:** does not meet minimum; substantial rework required.
- **1 — Not present:** category not addressed.
- **0 — Not applicable:** explicitly justified.

Pass threshold: **weighted average** ≥ 4.0 , and no category below 3.

Appendix C

Findings Video Recording Guide

C.1 Purpose

Produce a single findings video for the Project Management course (MU+MBAD7112+DEV_01) that leadership, IDs, authors, and Open edX experts can watch before cleanup begins.

C.2 Target Length

12–18 minutes.

C.3 Audience

Leadership, IDs, course authors, Open edX experts, multimedia team, QA reviewers, ICT.

C.4 Pre-Recording Checklist

- ☐ Screen resolution: 1920×1080
- ☐ Browser: Chrome, clean profile, no extensions visible
- ☐ Bookmark bar hidden
- ☐ Notifications silenced
- ☐ Studio logged in as admin
- ☐ Text editor tabs open for the specific files
- ☐ GitHub repo open in a second tab
- ☐ PDF of this document open in a third tab
- ☐ Microphone tested; backup audio recorder running
- ☐ Script printed or on second monitor

C.5 Scene-by-Scene Script

Scene 1 — Opening (0:00–1:00)

- Presenter on camera or title card: “Findings from the Project Management Course — Open edX Teak.”
- State purpose: identify defects blocking publication.
- State scope: 727 files, 14 courses, 1 pilot course.
- State non-goal: this video does not change course meaning, assessment logic, or learning outcomes.

Scene 2 — Course Metadata (1:00–2:30)

- Open the `about/` directory in Finder/Explorer.
- Show `ls -al` output with 0-byte files.
- Explain catalog blocker.
- Show `entrance_exam_minimum_score_pct.html` containing only 50.

Scene 3 — Placeholder Content (2:30–4:30)

- Open Studio course outline.
- Navigate to Module One.
- Show `[Insert module objective here]` in the rendered preview.
- Show the source HTML with placeholders.
- Show count of placeholders across the course.

Scene 4 — Duplicate Live/Draft Components (4:30–6:00)

- Show `html/` and `drafts/html/` side by side.
- Point out the 8 duplicate UUID pairs and `html1`, `html2`, `html4`, `html6`, `html8`, `html19`.
- Explain: Studio may publish whichever version is newer; this is a version-control risk.

Scene 5 — Cross-Course Contamination (6:00–7:30)

- Open `html1.xml` — show `copied_from_block="block-v1:ASU+T101SBX+DEV_01..."`.
- Open `problem1.xml` — show `block-v1:e-SHE+CE105+Q1...`
- Open `static/` — show ASM246 file, ASU banners, e-SHE templates.
- Explain: this is ASU/e-SHE template content inside an MU course.

Scene 6 — HTML Defects (7:30–9:00)

- Show `<ul><ul>` nesting in `b824e481...html`.
- Show orphan attribute `<span div="" ...>` in `a4c63782...html`.
- Show `target="[object Object]"`.
- Show heading misuse: `<h4><img ... alt="Learning Outcomes" /></h4>`.

Scene 7 — Embedded Styles (9:00–10:30)

- Show `.instructor-module-banner` in `81723e3f...html`.
- Show `contenteditable="true"`.
- Explain: this will override any course-wide CSS and is a security/UX risk.

Scene 8 — Assessment Defects (10:30–12:00)

- Open `problem1.xml` — show all `correct="true"` and explain Teak behavior.
- Open `problem2.xml` — show placeholder answer key.
- Open `ee78b25a...xml` — show invalid XML structure.
- Open `cc44e80a...xml` — explain ORA vs problem mismatch.

Scene 9 — Video Defects (12:00–13:30)

- Show the 8 `video/*.xml` files.
- Highlight duplicate YouTube ID `3_yD_cEKoCk`.
- Highlight missing captions and transcripts.
- Highlight malformed display name `": What does a project manager do?"`.
- Show `video_iframe` divergence from roadmap.

Scene 10 — Summary of Defects (13:30–15:00)

- Show a summary slide with the P0 items:
 1. Populate `about/` metadata.
 2. Remove all placeholders.
 3. Resolve live/draft conflicts.
 4. Fix duplicate YouTube ID and add captions.
 5. Validate problem XML in Teak.
 6. Redesign self-assessment for Teak.
 7. Confirm `course_wide_css`, `video_iframe`, `advanced_modules`.

Scene 11 — Closing (15:00–16:00)

- State next steps.
- Point to GitHub repo for this document.
- Thank audience.

C.6 Post-Recording Checklist

- ☐ Audio clear
- ☐ No private data on screen
- ☐ Captions added (English, and Amharic if possible)
- ☐ Transcript published alongside video
- ☐ Video length as planned
- ☐ Uploaded unlisted to YouTube with roadmap-compliant privacy
- ☐ Shared link in GitHub repo
- ☐ Notified stakeholders per Section 5 of the sharing guidance

Appendix D

Open edX Teak Notes

D.1 What Teak Changes for This Project

- **Course-wide CSS** is supported via `course_wide_css` in Studio Advanced Settings.
- `video_iframe` is not a standard XBlock.
- **Multiple-choice items with all correct choices** award a point only for the first correct choice.
- **Several** `advanced_modules` in `DEV_01.xml` are not shipped with Teak by default: `crowdsourcenhinter`, `recommender`, `rate`, `staff_graded`, `google_drive`, `videoalpha`, `video_iframe`. Confirm install status.
- **OLX** remains the import/export format.
- **Studio preview** in Teak respects course-wide CSS.

D.2 Recommended Teak-Safe XBlock Set

- `html`
- `problem` (with `multiplechoiceresponse`, `choiceresponse`, `numericalresponse`, `stringresponse`, `optionresponse`)
- `video`
- `discussion`
- `openassessment` (ORA)
- `library_content`
- `poll`
- `survey`
- `word_cloud`
- `drag_and_drop_v2`
- `lti_consumer`
- `scorm`
- `pdf`
